

# 128-in-1 Flash Multi-Cart

with On-Screen Menu and USB Interface

High Capacity Video  
Game Cartridge for  
**COLECOVISION™**  
& ADAM Family Computers

## WINDOWS XP QUICK START GUIDE - IMPORTANT NOTICE

Before connecting the Multicart to the computer, install the Studio software from the CD. The drivers required for the PC to recognize the Multicart correctly are installed at the same time.

## INSTALLING THE PC SOFTWARE

Insert the CD into the computer. The Studio Install should start automatically. If not, navigate to your CD drive and run the **USBCOLECO.EXE** program. You will see the welcome screen.

Welcome to Atarimax ColecoVision Multi-Cart Studio Setup program. This program will install Atarimax ColecoVision Multi-Cart Studio on your computer.

When ready, click 'Next'.

Destination Folder

C:\...\ColecoVision USB Multi-Cart Studio

Browse...

The directory where the Studio program will be installed is now shown.

You may change it by clicking on the "Browse" button and selecting a different directory. When ready, click 'Next'.

Enter the name of the Program Manager group to add Atarimax ColecoVision Multi-Cart Studio icons to:

Atarimax

A program folder will be created. If you would like to change the description, type it in now.

When ready, click 'Next'.

Click 'Next' twice to confirm your settings and finish the Multi-Cart Studio software installation.

## INSTALLING THE DRIVERS SOFTWARE (Windows XP)

Attach one end of the USB cable to the cartridge and the other directly to a free USB port on your PC. **Do not use a USB hub of any kind for initial setup and testing.**

You should see the new hardware notification bubble appear. Wait a few seconds for the new hardware wizard to begin.

Select 'Install the Software Automatically'.

Click 'Next' to continue. 

The hardware installation wizard will now search your local CD-ROM drive for the appropriate drivers.

A warning may appear saying the driver is 'unsigned'. Press the 'Install Anyway' option to continue.

Driver installation is complete. Press 'Finish' to exit this dialog. 

You can now run the Multi-Cart Studio software and your cartridge status indicator in the program should say **CONNECTED** when the cartridge is plugged in.

**For Windows 98, ME or 2000 Instructions, please visit the web site at <http://www.atarimax.com/>**

# COLECOVISION

## 128-in-1 Flash Multi-Cart with On-Screen Menu and USB Interface

*Your Multi-Cart The Way You Want It!*

Your ColecoVision 128-in-1 Flash Cartridge allows you to load up to 127 of your favorite ColecoVision game titles onto one easy to use game cartridge!

The on-screen menu makes selecting your favorite games easy and fast. You can even enter the game number directly on the ColecoVision keypad.

The full speed USB interface allows you to add games in only seconds and the easy drag and drop Multi-Cart Studio software allows you to personalize every aspect of your multicart including the games, text, fonts, colors and more!

The 128-in-1 Flash Cartridge is the perfect accessory for gamers, collectors and home brew game developers.
